EDUCATION

Brandeis School of Business and Economics

Waltham, MA

Candidate for Master of Science in Business Analytics (STEM-Designated)

08/2025 - present

Relevant Coursework: Data Analytics Associate Certification (DataCamp), Foundations of Data Analytics, Python and its Application to Business Analytics, Introduction to Probability for Business and Economics

Ashesi University

Bachelor of Science in Management Information Systems

01/2021 - 08/2024

Relevant Coursework: Data Analytics for Business, Competitive Strategy, e-commerce, Entrepreneurship Capstone, Intro to AI, Quantitative Methods, Statistics, Database Management, Project Management, Leadership as Service

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, PHP, JavaScript

Analytics & Machine Learning: Data Cleaning, Data Wrangling, Feature Engineering, Predictive Modeling, Classification Models, Forecasting, SMOTE, A/B Testing

Certifications: Data Analyst Associate (DataCamp), Data Science with Python (CodeSignal)

WORK EXPERIENCE

Clean Plate Labs

Arizona, USA

Website Quality Assurance Intern

09/2024 - 07/2025

- Conducted structured website QA reviews to test functionality, responsiveness, and SEO performance across WordPress-based client sites
- Monitored user behavior using Google Analytics, generating insights that increased user engagement by 15% and improved average navigation speed by 10%

International Organization for Migration

Geneva, Switzerland

Research Scientist Intern

04/2025 - 07/2025

- Cleaned and structured 600,000+ refugee records from 90+ countries into analyzable Excel datasets for policy and humanitarian analysis
- Developed deep learning forecasting models to predict refugee inflows across 20+ SADC countries, improving prediction accuracy by 18% and enabling stronger planning for resource allocation

PROJECTS

Customer Shopping Behavior Analytics Project – Brandeis University

09/2024 - 11/2024

- Cleaned and engineered a 1M-row retail dataset down to 3.9K optimized records, standardizing 78→17 variables and building segmentation features (age bands, loyalty tiers, spend groups)
- Executed 20+ advanced SQL operations (CTEs, window functions, views, procedures) and improved query performance by 20x on large tables (0.014s→0.00064s) through single and composite indexing
- Implemented 10 SQL triggers to log insert/update/delete events and maintain a full audit trail

Customer Spending Prediction — Identifying High-Value Buyers

09/2024 - 10/2024

- Built predictive models using Logistic Regression, Random Forest, and XGBoost to classify high-value customers, improving identification accuracy by 22%.
- Engineered a *High_Spender* target variable and applied SMOTE balancing, boosting minority-class recall by 30%.
- Delivered actionable insights for marketing segmentation and customer prioritization.

ACTIVITIES/SKILLS

Activities: Data Analytics Club (Fall, 2025), Africa Business Concept Challenge Winner (Spring 2022)

Volunteer: Office of Diversity and International Programs (Event Planner, 2023), English Teacher (Fall, 2022)

Languages: English (Native) and Portuguese (Advanced), Zulu (Advanced)
