

Judercio Jose Nhauche

Waltham, MA | 857-919-3713 | jnhauche@brandeis.edu | [LinkedIn](#) | [GitHub](#) | [PortfolioWebsite](#)

EDUCATION

Brandeis School of Business and Economics
Master of Science in Business Analytics (STEM-Designated), GPA: 3.72/4.0
Relevant Coursework: Healthcare Analytics, Advanced Data Analytics, Python and its Application to Business Analytics, Introduction to Probability for Business and Economics, Marketing Analytics

Waltham, MA
12/2026

Ashesi University — Second Class Upper Division (Honors)
Bachelor of Science in Management Information Systems
Relevant Coursework: Intro to AI, Statistics, Quantitative Methods, Database Management, E-commerce

01/2021 - 08/2024

TECHNICAL SKILLS

Programming: Python, SQL, R, PHP, JavaScript
ML/Data Science: Supervised & Unsupervised Learning, Feature Engineering, Forecasting, Model Evaluation, SMOTE, Hypothesis Testing, A/B Testing
Analytics Tools: Pandas, NumPy, scikit-learn, Tableau, GA4, Search Console
Deployment/API's: REST APIs, Cloudflare Workers (serverless), AWS, Web dashboards
Certifications: Data Analyst Associate (DataCamp), Data Science with Python (CodeSignal)

WORK EXPERIENCE

Massachusetts Institute of Technology (MIT)
Incoming Research Data & Analytics Intern (FACT Alliance)

Cambridge, MA
05/2026 - 08/2026

- Selected to support the FACT Alliance in designing and maintaining structured databases to track researcher expertise, funding opportunities, and cross-institutional collaborations.
- Will build web-based data tools to improve information accessibility and support interdisciplinary research coordination across 20+ global institutions.
- Apply database design and analytics to improve visibility of research capacity and funding alignment.

International Organization for Migration
Research Scientist Intern

Geneva, Switzerland (Virtual)
04/2025 - 07/2025

- Performed large-scale data mining and exploratory analysis on 600K+ refugee records across 90+ countries, improving dataset usability for humanitarian decision-making.
- Built and evaluated forecasting and deep learning models to predict refugee inflows across 20+ SADC countries, improving prediction accuracy by 18% and enabling better resource planning.
- Documented assumptions and modeling outputs to support transparency and reusability for future analysis.

Clean Plate Labs
Web Analytics & QA Intern

Arizona, USA
09/2024 - 07/2025

- Built an end-to-end business analytics reporting workflow using GA4 + Search Console, translating raw web data into structured datasets for traffic, engagement, and conversion performance.
- Produced actionable insights by analyzing channel performance (organic, paid, referral), engagement metrics (time on page, bounce rate), and conversion events, helping prioritize high-intent traffic sources.
- Deployed an LLM-powered chatbot on a production WordPress website, gaining hands-on experience with real user flows, QA testing, and AI tool integration.

PROJECTS

US Macro Dashboard + Forecast (2026) — Live FRED Data + Serverless Forecasting
JavaScript • Cloudflare Workers • APIs • Time Series Forecasting

- Built a lightweight [forecasting dashboard](#) that retrieves live U.S. macroeconomic indicators (CPI, unemployment, Fed funds rate, industrial production) and generates a structured 2026 outlook.
- Designed a serverless API using Cloudflare Workers to fetch data, compute short-horizon trend forecasts, and return chart-ready outputs in real-time.
- Produced a narrative forecast including a baseline scenario, chart-by-chart implications, and risk factors, enabling interpretation for technical and non-technical audiences.

BracketIQ — Data Science Project
Python • Flask • Machine Learning • Data Visualization

- Developed an end-to-end NCAA tournament simulation [platform](#) using Flask, enabling users to generate and analyze custom March Madness tournament brackets with real-time data
- Engineered and integrated predictive models (Logistic Regression, Random Forest, XGBoost), improving bracket prediction accuracy by 18% over baseline methods.
- Automated data ingestion and feature engineering pipelines, reducing manual data processing time by 70% and supporting analysis of over 10,000 historical games.

ACTIVITIES/SKILLS

Activities: Data Analytics Club (Fall, 2025), Africa Business Concept Challenge Winner (Spring 2022)
Languages: English (Native) and Portuguese (Advanced), Zulu (Advanced), Spanish (Beginner)
